## DAVIS AUTOMOTIVE AND MCCAIN'S A/C HAVE JOINED FORCES!

*Please share your  
experience with us!*

**Happy Father's Day!**

Major Davis and Mark McCain retired December 31, 2016. My name is Rick Davis and I am the owner of the new Davis Automotive. As customers of both companies, you will continue to see the friendly faces you recognize. By combining the specialties of both companies, Davis Automotive's goal is to provide you with the same quality repairs you have come to expect in a timely manner.

### **Improvements**

In the last three months, we have concentrated on improvements to the work area. We have done a thorough cleaning, added new lighting, rewired the electrical and internet services and run new air lines. We have also worked on expanding this area by adding 3 new lifts and investing in new diagnostic equipment. All of these changes will help us to

With Father's Day this month I wanted to wish all fathers a great and enjoyable day. Let me tell you a little about my Dad. M.L. Davis founded Davis Automotive and celebrated his 89<sup>th</sup> birthday in May. He still comes to the shop almost every day to help any way he can. He drives customers home or to work, picks up parts for the vehicles and helps the other techs when 2 people are needed. If you see him around say Hi.

better service your vehicles. Also make sure to notice our mechanics' spiffy new uniforms.

In the upcoming three months, we plan on focusing on the front office. We will be updating the lobby area, the waiting room and the outside appearance. We also plan to update our management software so we can offer text message notifications, digital inspection reports, online appointment scheduling and more. Gina, Randy and I are always available by phone to answer any and all questions if you prefer to talk to us instead of communicating electronically.

### Meet the Crew

In the coming newsletters we will use this section to introduce our employees to you. I will begin with me. I am Rick Davis. I was not even a twinkle in my parents' eyes when my Dad started Davis Automotive 55 years ago. I grew up running around in the shop and doing odds and ends

for my Dad and brother. My Dad was ready to retire about the same time I graduated from UTA with a Bachelor Degree in Finance, so I bought out his half of the business in 1993. I am an ASE Master Technician with 10 certifications including Advanced Drivability. I am also certified as an ASE Service Consultant. Outside of work I enjoy spending time with my wife of 23 years and our two daughters. I also love to find the time to ride bicycles. Ask me about my favorite rides sometime.

---

### **8 SUMMER ROAD TRIP TIPS**

- Under hood inspection- This should be done once a month, but when leaving on a trip you want to double check these items: Fluid levels, belts, hoses and battery condition are the basics, but also check the antifreeze strength to protect you from overheating.
- Safety Inspection- Things like exterior lights, wiper blades and brake operations can play an important part of a safe trip.
- Air Conditioning operation- The A/C may be cold now but as temperatures rise, you and your passengers may feel the heat too.
- Tire Condition and pressures- No one wants to be on the side of a road changing a flat because they didn't see a tire wearing on the inside or running low on air. Also check the spare tire; there is nothing like changing a flat with another flat tire.
- Chassis Inspection- We have the tires looking good and a worn chassis part can wear a tire out on a long road trip.
- Hidden DTC's (Diagnostic Trouble Codes)- We all can look at the check engine light and see if it's on but what if there is a pending problem that has not caused the light to come on yet?

- Get the most out of your fuel economy- Removing the “junk in the trunk” before you go will help on weight. A good air filter will allow the vehicle to breathe and get better gas mileage.
- Traffic App on your smart phone- This can save hours of being in traffic in a new city or a backup because of an accident that shut down the highway.
